

What kinds of thinking are you after in your classroom or school?

Ideas:

creative, critical, logical reasoning,
divergent, individualized, I can rather
than I can't, fearless, outside the box,
collaborative, analytical, empathic,
inquisitive, holistic, respectful, I want to
be here rather than I have to be here,
unprompted, self motivated, make broad
connections, sense of urgency, ask
questions when they don't understand,
reflective
